Lesson 03 Demo 01

Creating a New User in Jenkins

Objective: To create a new user in Jenkins for managing access and permissions within the Jenkins environment

Tools required: Jenkins

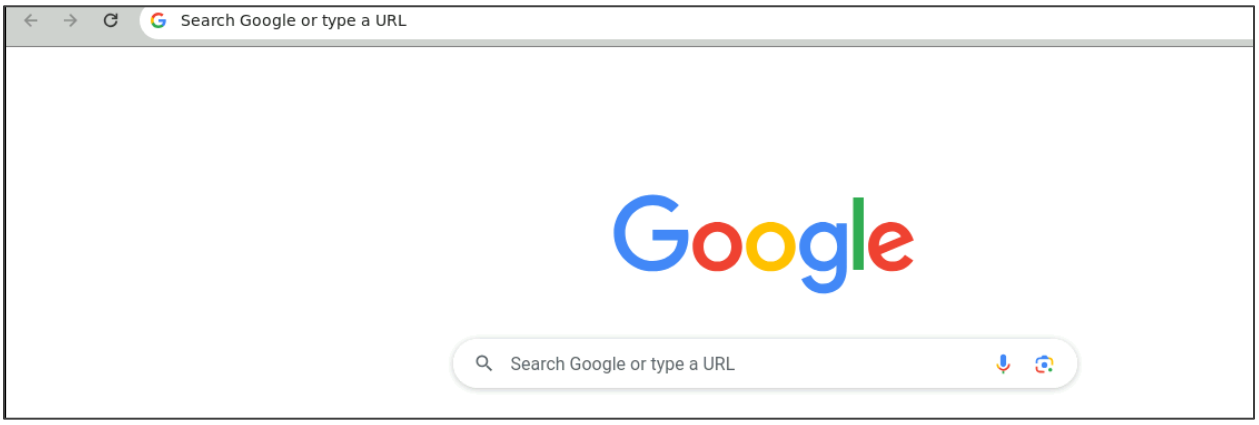
Prerequisites: Jenkins must be operational

Steps to be followed:

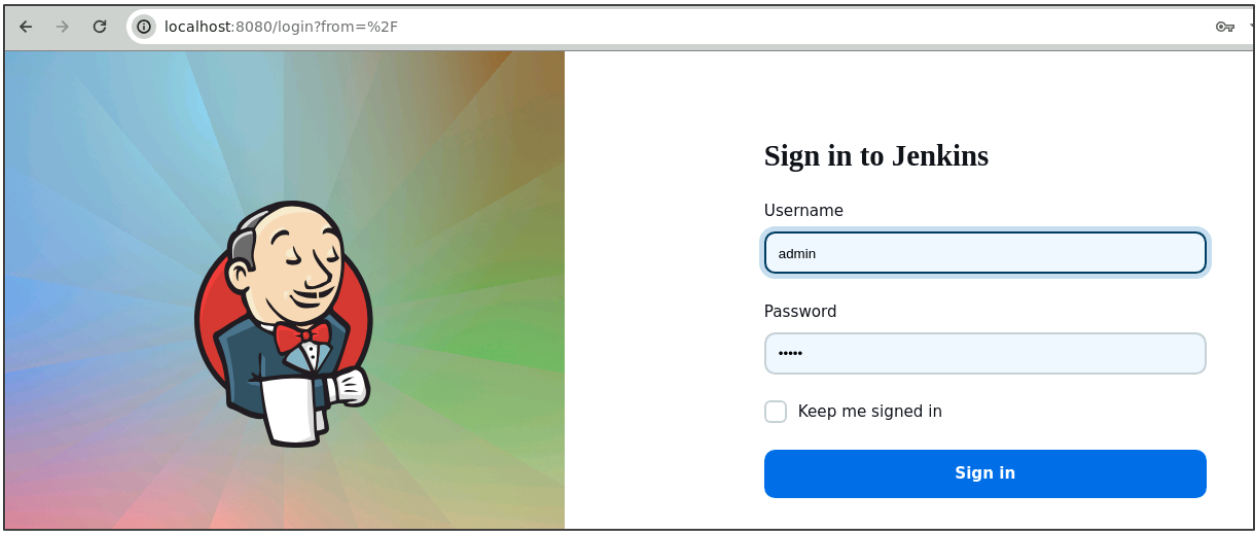
1. Log in to the Jenkins CI tool
2. Access the user management section to manage users

Step 1: Log in to the Jenkins CI Tool

1.1 Go to **Google Chrome**



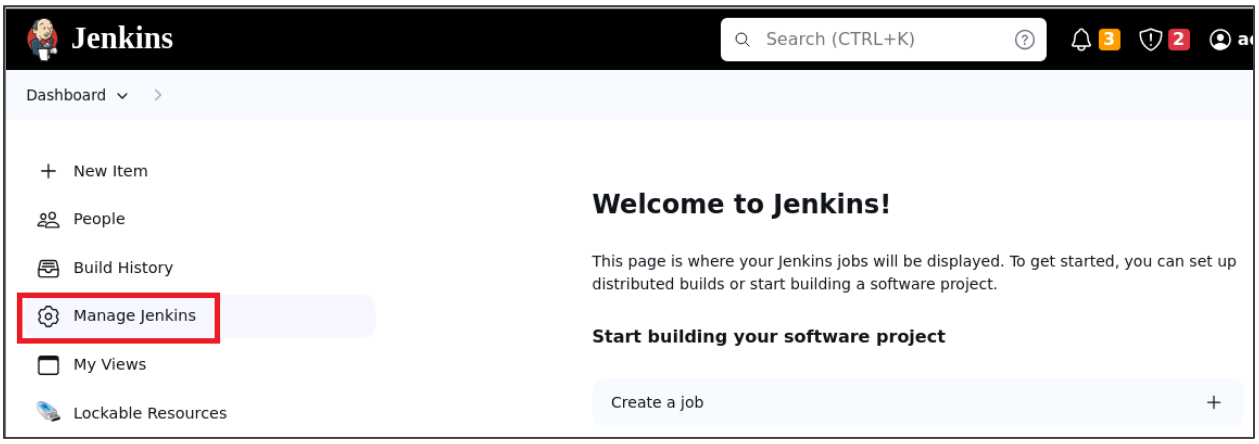
1.2 Go to Jenkins by typing **localhost:8080** and sign in using your credentials



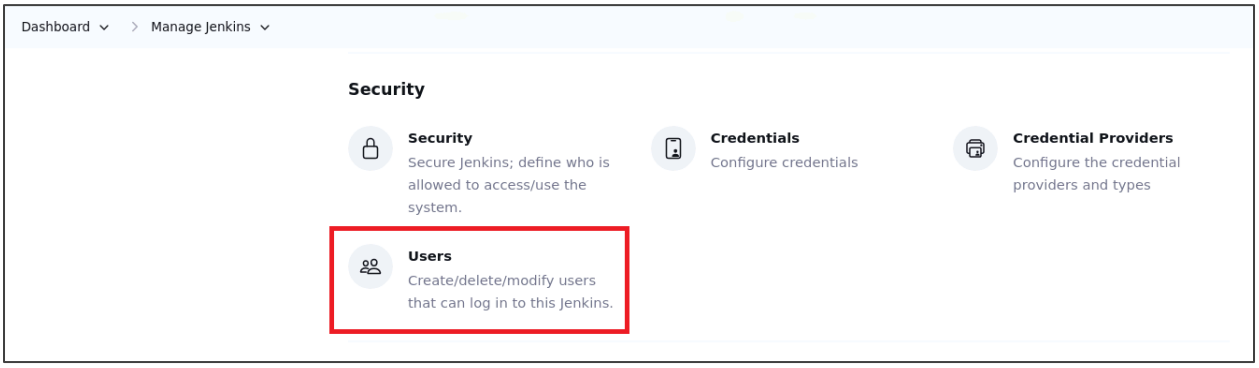
Note: The credentials for accessing Jenkins in the lab are Username: **admin** and Password: **admin**.

Step 2: Access the user management section to manage users

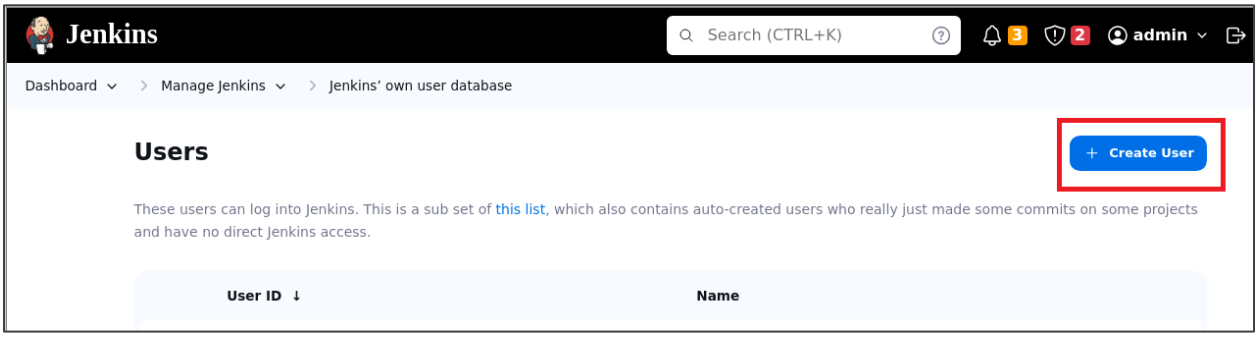
2.1 Click on **Manage Jenkins**



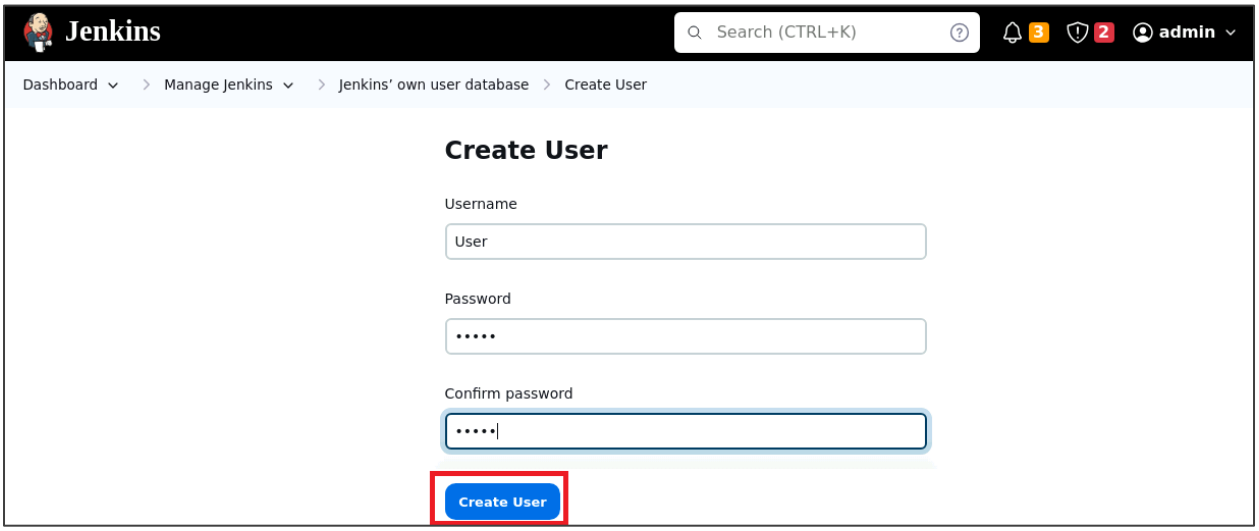
2.2 Click on **Users** under the **Security** section

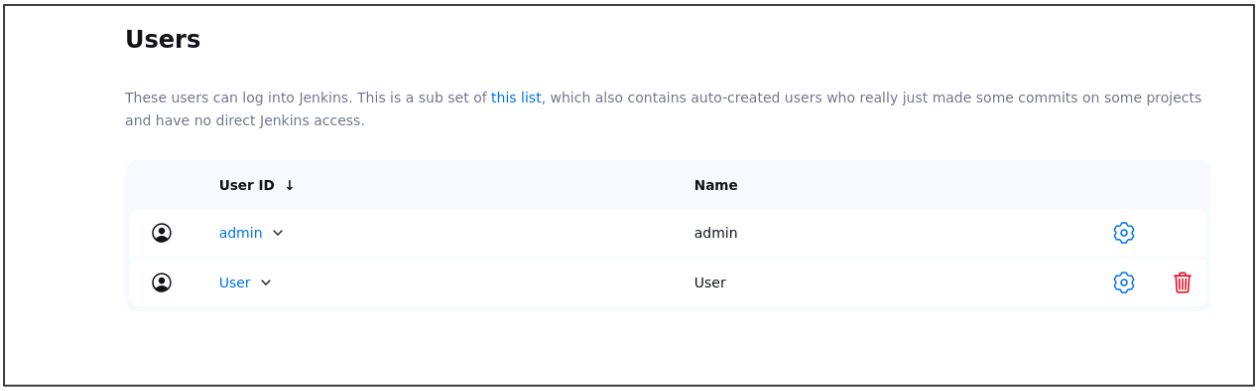


2.3 Now, click on **Create User**



2.4 Provide the basic user details, including username, password, and email ID, and click on **Create User**





Once the user is created, you can use these credentials to access the Jenkins application.

By following these steps, you have successfully created a new user in Jenkins for managing access and permissions within the Jenkins environment.
