

Lesson 02 Demo 01

Creating Azure Policy

Objective: To create an Azure policy for enforcing organizational standards and assessing compliance at-scale

Tools required: Azure account with administrator access

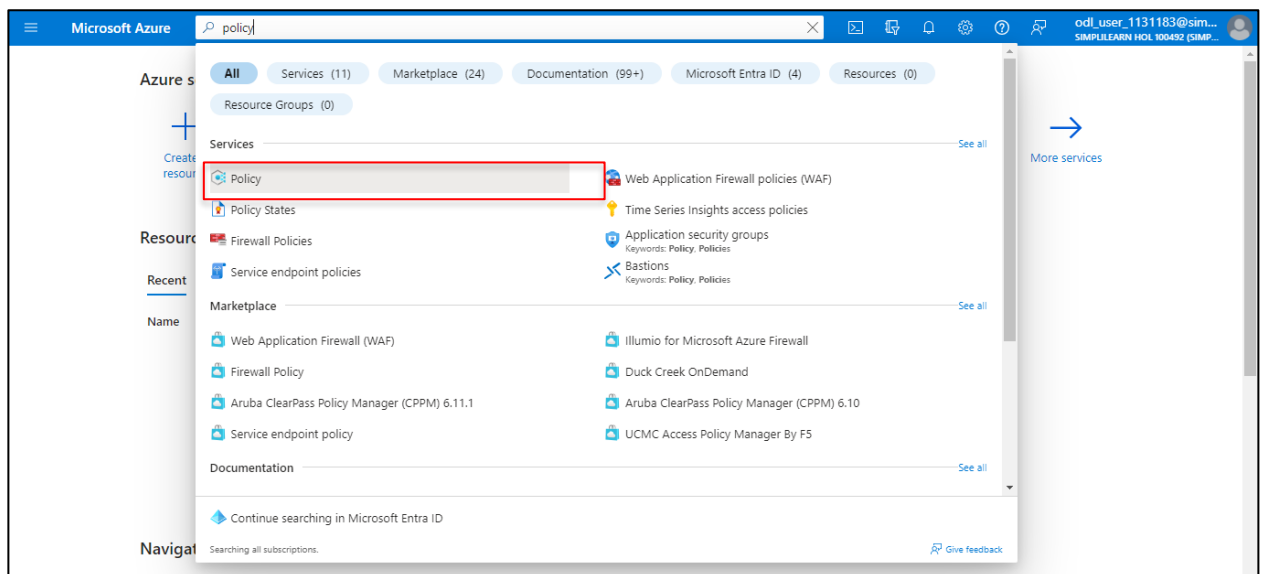

Prerequisites: None

Steps to be followed:

1. Define a policy

Step 1: Define a policy

1.1 Log in to the Azure portal, and search for and select **Policy**

1.2 In the **Policy** page, navigate to the left panel and select **Definitions** under **Authoring**

Microsoft Azure Search resources, services, and docs (G+)

Home > Policy

Search

Scope: Simplilearn HOL 100836

Compliance state change events are now available at the management group level! Use event-based architecture to react to notifications via supported event handler. Learn more <https://aka.ms/policyPlusEventGrid>

Overall resource compliance 0%
0 out of 2

Resources by compliance state
0 - Compliant
2 - Non-compliant

Non-compliant initiatives
1 out of 1

Non-compliant policies
28 out of 237

1.3 In the **Definitions** page, click on **+ Policy definition**

Microsoft Azure Search resources, services, and docs (G+)

Home > Policy

Policy | Definitions

Search

Filter by name or ID... Scope: Simplilearn HOL 100492

Definition type: All definition types Policy type: All policy types Category: All categories

Name	Definition location	Poli...	Type	Definition t...	Category
az305 - tagging initiative	Simplilearn HOL 1004...	1	Custom	Initiative	lab
Get secure	Simplilearn HOL 1004...	1	Custom	Initiative	user1
Enable Azure Monitor for VMSS with Azure Monitor		7	Builtin	Initiative	Monitoring
Enable audit category group resource logging for s...		33	Builtin	Initiative	Monitoring
Audit Public Network Access		36	Builtin	Initiative	SDN
Configure secure communication protocols(TLS 1.1)		3	Builtin	Initiative	Guest Configuration
FedRAMP Moderate		666	Builtin	Initiative	Regulatory Compliance
Configure Advanced Threat Protection to be enable		3	Builtin	Initiative	Security Center
[Preview]: Deploy Microsoft Defender for Endpoint s		4	Builtin	Initiative	Security Center

1.4 In the **Policy definition** page, enter the information as shown:

1.5 Under **POLICY RULE**, copy and paste the following JSON code in the box provided as shown in the screenshot below:

```
{  "policyRule": {    "if": {      "allOf": [{        "field": "type",        "equals": "Microsoft.Compute/virtualMachines"      },        {        "field": "Microsoft.Compute/virtualMachines/sku.name",        "like": "Standard_G*"      }    ]  },    "then": {      "effect": "deny"    }  } }
```

```
1  ]  },    "then": {      "effect": "deny"    }  } }
```

1.6 Click on **Save**

The new policy is created as shown in the screenshot below:

By following these steps, you have successfully created an Azure policy for enforcing organizational standards and assessing compliance at-scale.
