

Lesson 02 Demo 02

Assigning a Built-in Azure Policy to an Azure Resource Group

Objective: To assign a built-in Azure policy to an Azure resource group for enforcing compliance and governance

Tools required: Azure account with administrator access

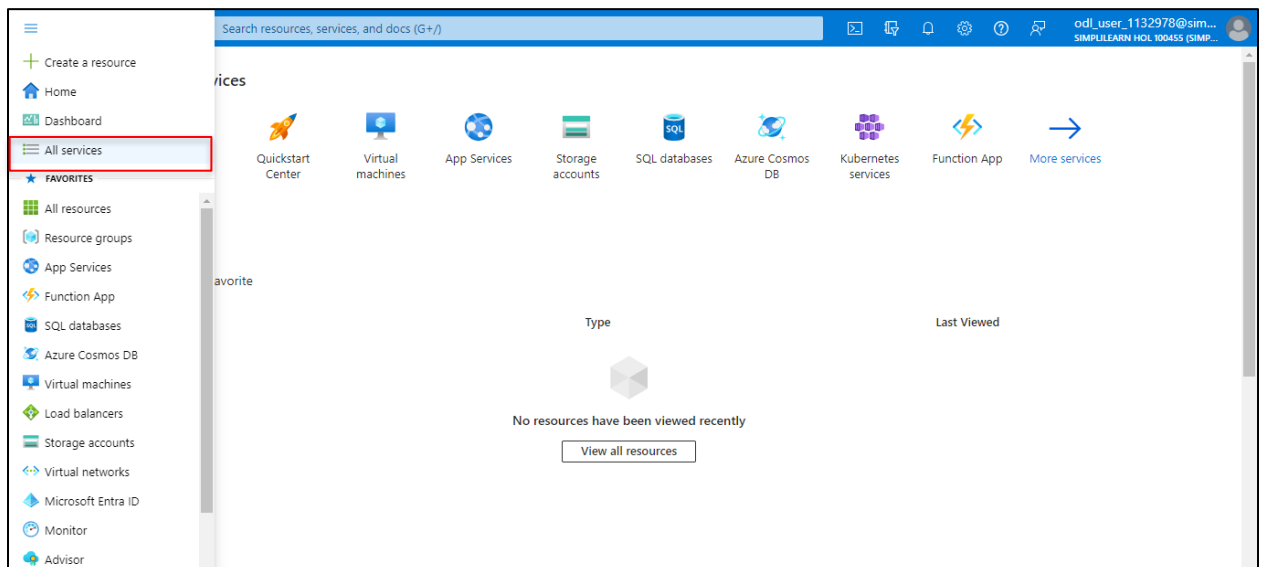

Prerequisites: Resource group

Steps to be followed:

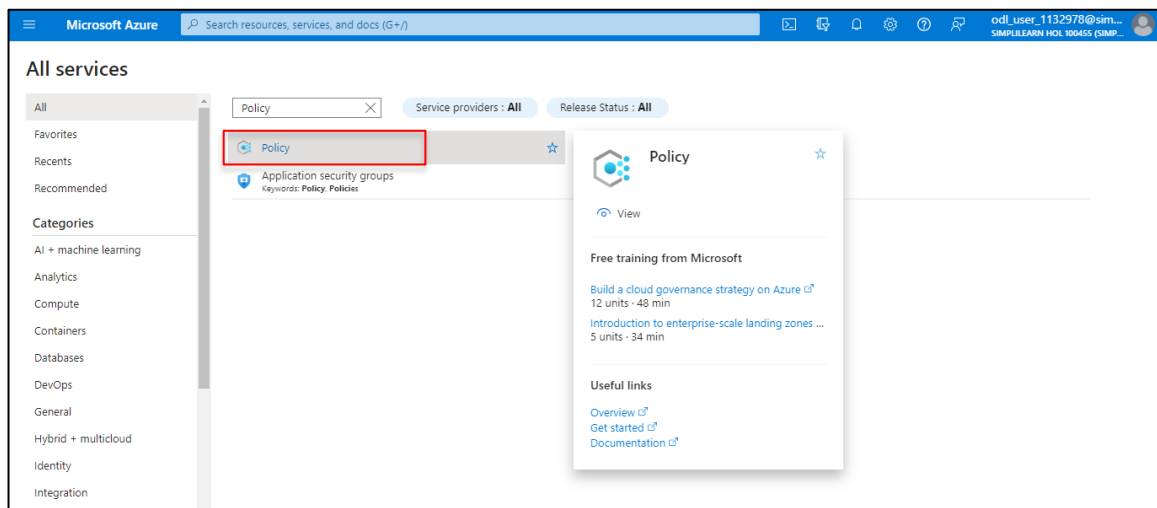

1. Assign a policy

Step 1: Assign a policy

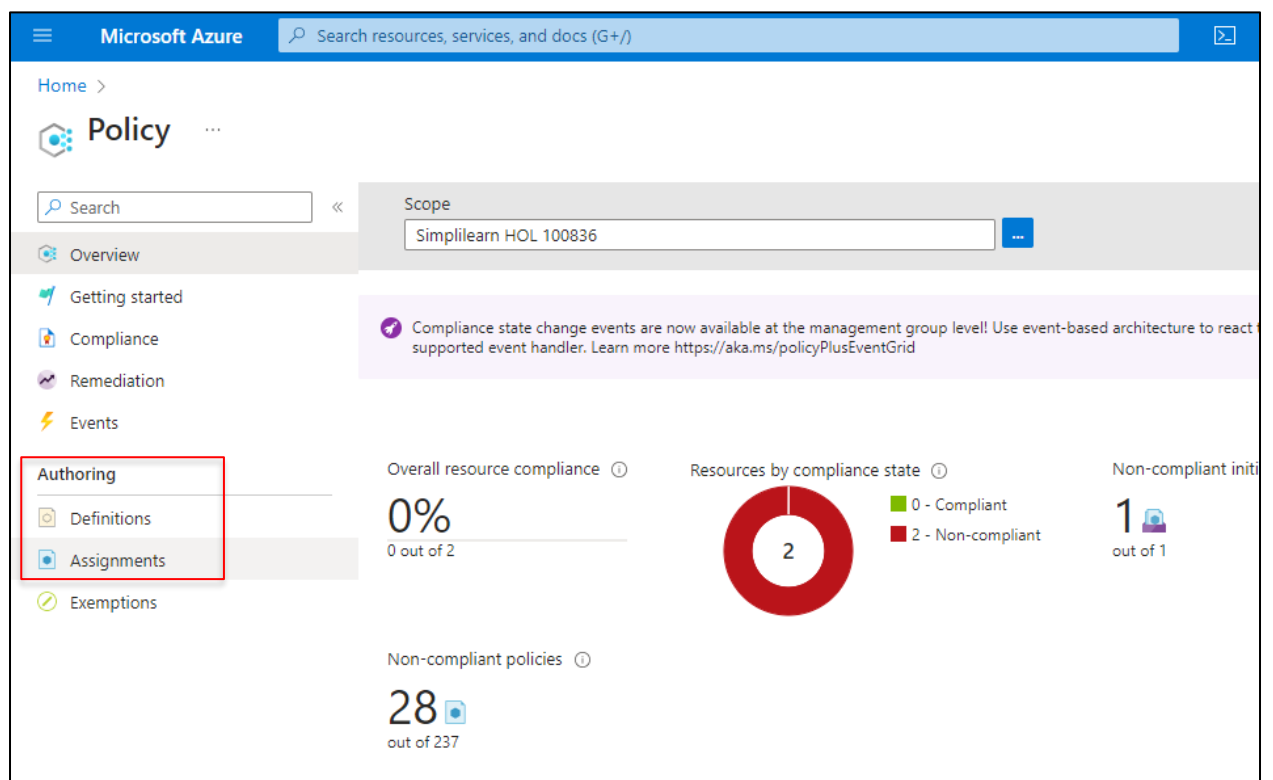

- 1.1 Log in to the Azure portal, click on the three horizontal lines at the top left corner of the page, and select **All services**

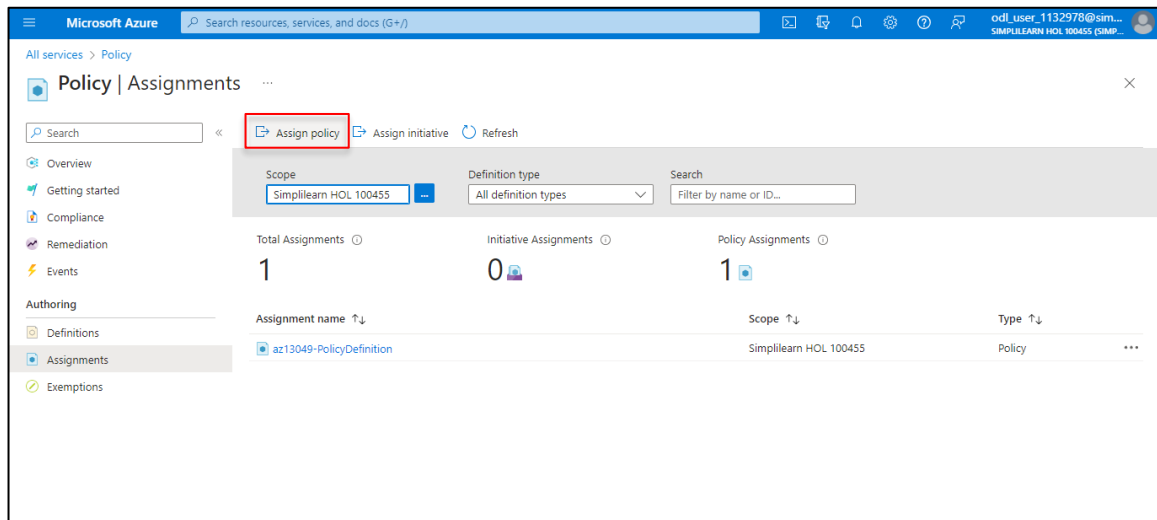

1.2 In the **All services** page, search for and select **Policy**

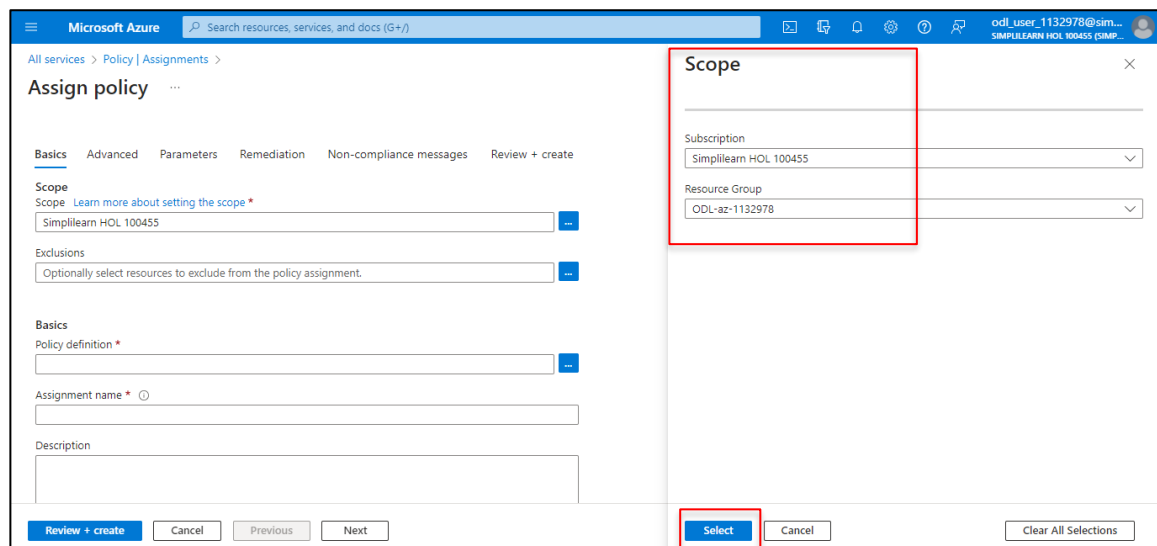

1.3 In the **Policy** page, navigate to the left panel and select **Assignments** under **Authoring**

1.4 In the **Assignments** page, click on **Assign policy**

1.5 In the **Assign policy** page, navigate to the **Basics** tab and select **Scope**. Then, in the **Scope** page, click on the suitable subscription from the drop-down menu and select the previously created **Resource Group**. Finally, click on **Select**.

1.6 Click on the three dots located under **Policy definition** to display the list of available definitions

Microsoft Azure | Search resources, services, and docs (G+)

All services > Policy | Assignments >

Assign policy

Basics | Advanced | Parameters | Remediation | Non-compliance messages | Review + create

Scope [Learn more about setting the scope *](#)

Scope: Simplilearn HOL 100455/ODL-az-1132978 ✓

Exclusions

Optionally select resources to exclude from the policy assignment.

1.8 Navigate to the **Remediation** tab, ensure that the **Create a Managed Identity** option is unchecked, and click on **Review + create**

Microsoft Azure Search resources, services, and docs (G+/)

odl_user_1132978@sim... SIMPLILEARN HOL 100455 (SIMP...)

All services > Policy | Assignments >

Assign policy

Basics Advanced Parameters **Remediation** Non-compliance messages Review + create

By default, this assignment will only take effect on newly created resources. Existing resources can be updated via a remediation task after the policy is assigned. For deployIfNotExists policies, the remediation task will deploy the specified template. For modify policies, the remediation task will edit tags on the existing resources.

Managed Identity

Policies with the deployIfNotExists and modify effect types need the ability to deploy resources and edit tags on existing resources respectively. To do this, choose between an existing user assigned managed identity or creating a system assigned managed identity.

[Learn more about Managed Identity](#)

☐ Create a Managed Identity

Permissions

⚠ This policy does not contain any role definitions. deployIfNotExists and modify policies must specify role definitions in order to create the correct role assignments for the managed identity.

The Azure policy is successfully assigned as shown in the screenshot below:

The screenshot shows the Microsoft Azure portal interface for the 'Policy | Assignments' section. A notification banner at the top right states: 'Creating policy assignment succeeded. Creating policy assignment 'Audit virtual machines without disaster recovery configured' in 'Simplilearn HOL 100455/ODL-az-1132978' was successful. Please note that the assignment takes around 5-15 minutes to take effect.'

The main content area displays the following information:

- Scope:** Simplilearn HOL 100455
- Definition type:** All definition types
- Search:** Filter by name or ID...
- Total Assignments:** 2
- Initiative Assignments:** 0
- Policy Assignments:** 2

The table below lists the assigned policies:

Assignment name	Scope	Type
Audit virtual machines without disaster recovery configured	Simplilearn HOL 100455/ODL-az-1132978	Policy
az13049-PolicyDefinition	Simplilearn HOL 100455	Policy

By following these steps, you have successfully assigned a built-in Azure policy to an Azure resource group for enforcing compliance and governance.
