

Lesson 07 Demo 01

Creating Azure Site Recovery

Objective: To create Azure Site Recovery to ensure data protection and enable disaster recovery for applications

Tools Required: Azure account with login credentials

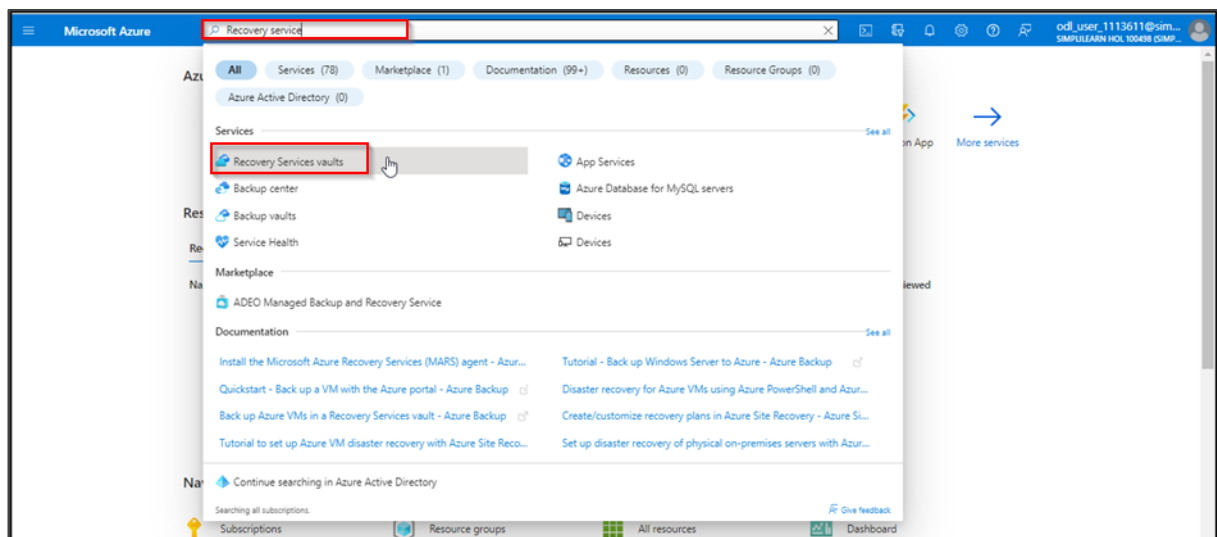

Prerequisites: None

Steps to be followed:

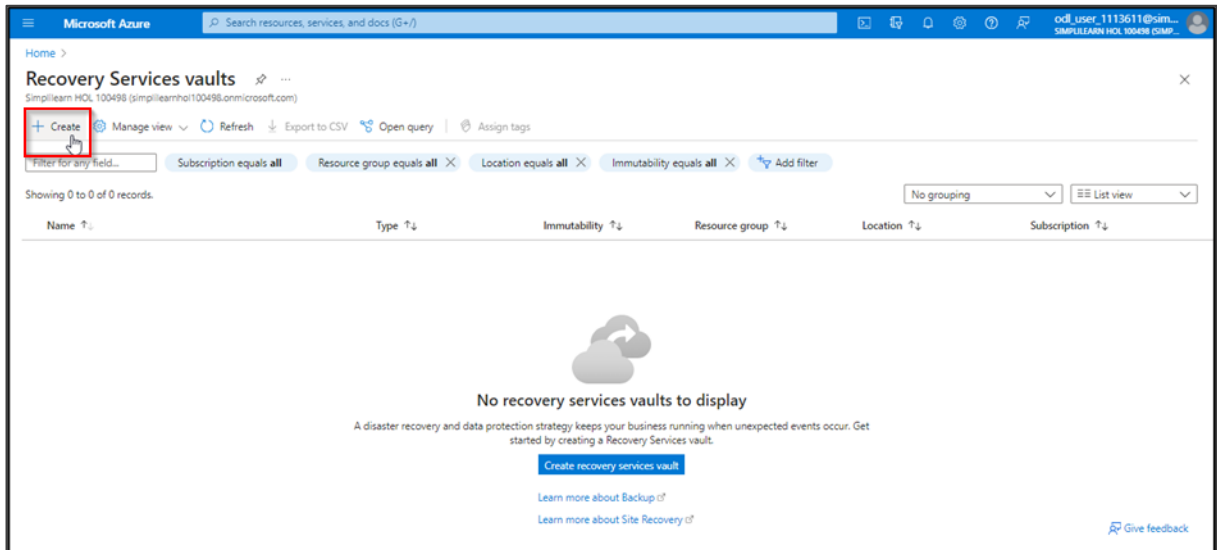

1. Create Azure Site Recovery

Step 1: Create Azure Site Recovery

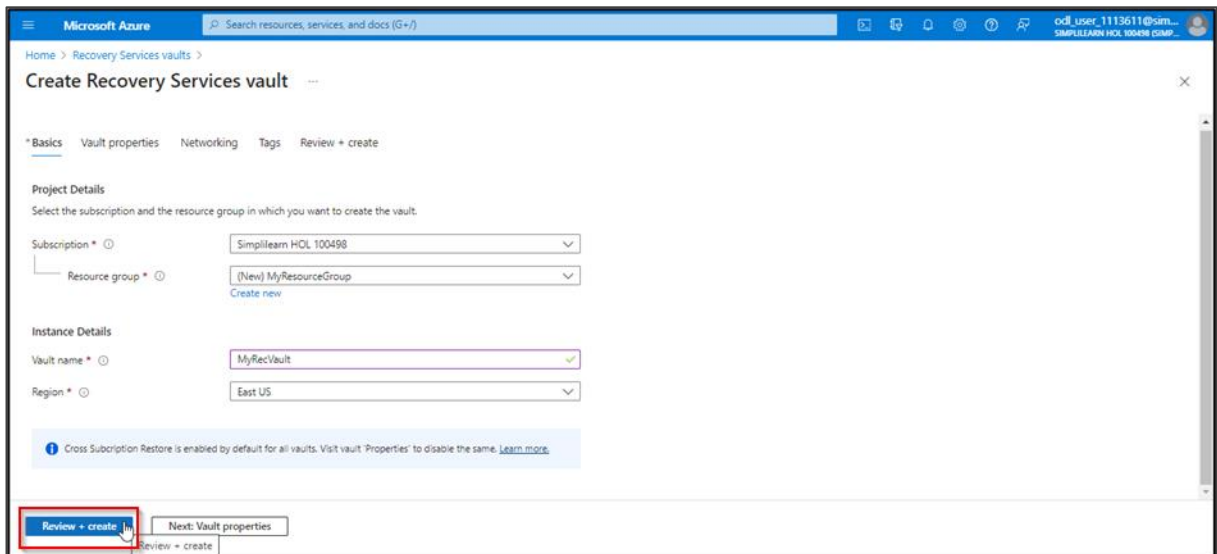

1.1 Search for and select **Recovery Services vaults**

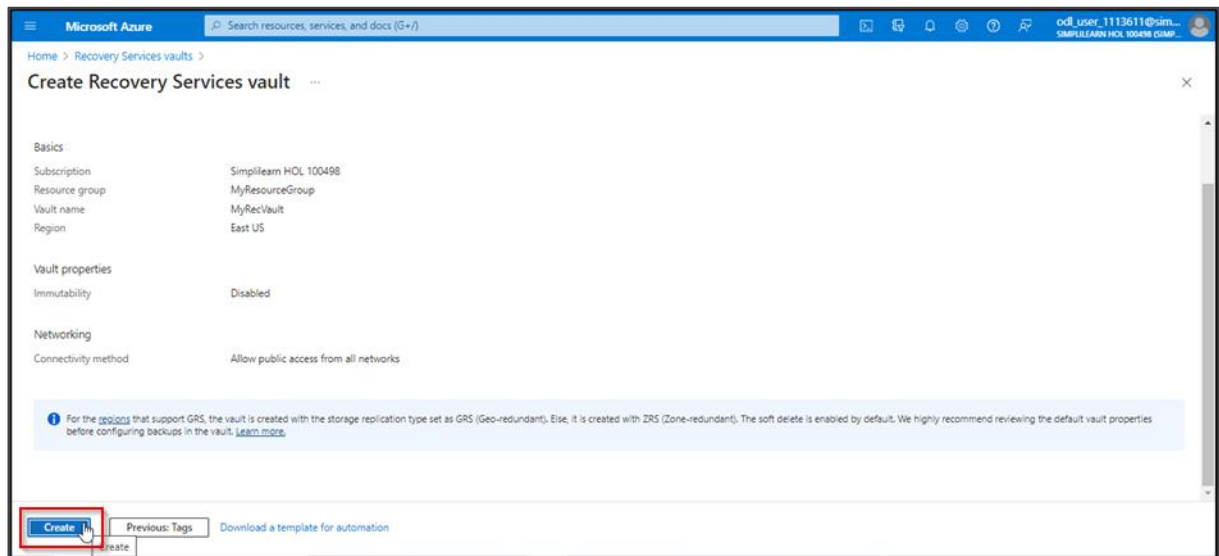

1.2 On the **Recovery Services vaults** page, click **+ Create**

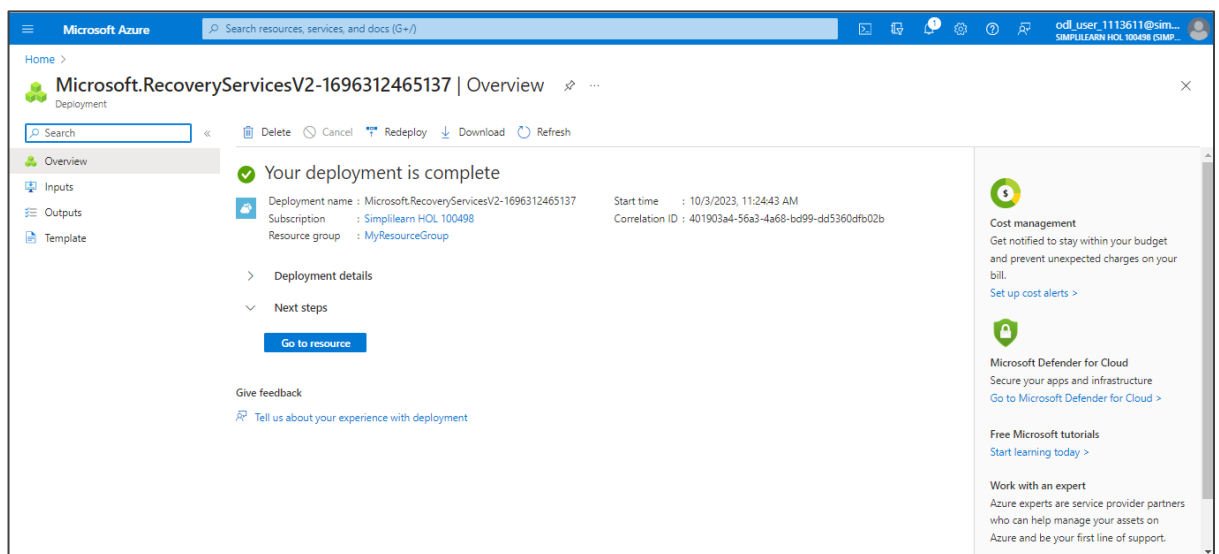

1.3 On the **Create Recovery Services vault** page, provide the required information as shown below. Now, click **Review + create**.

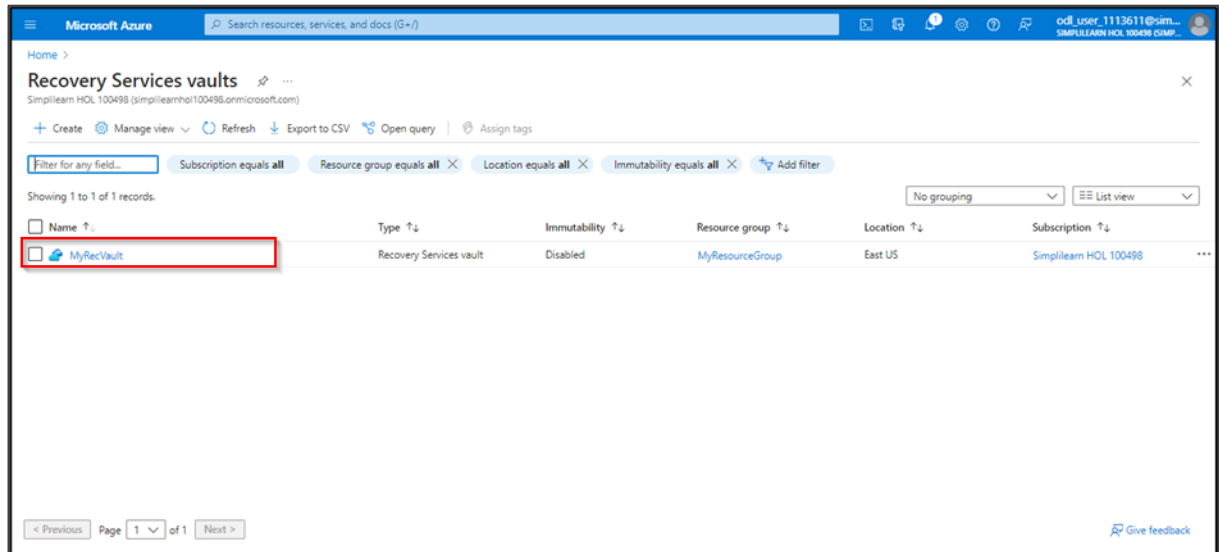

1.4 Click **Create** to initialize the deployment

The Recovery Services vault has been successfully created as shown below:

The newly created vault can be found on the **Recovery Services vaults** page as shown below:

You have successfully created an Azure Recovery Services vault, a key component of Azure Site Recovery, which is crucial for disaster recovery in Azure.
