

Lesson 08 Demo 02

Managing Storage Access Keys

Objective: To manage storage access keys to authorize access to data in the storage account

Tools required: Azure account with administrator access

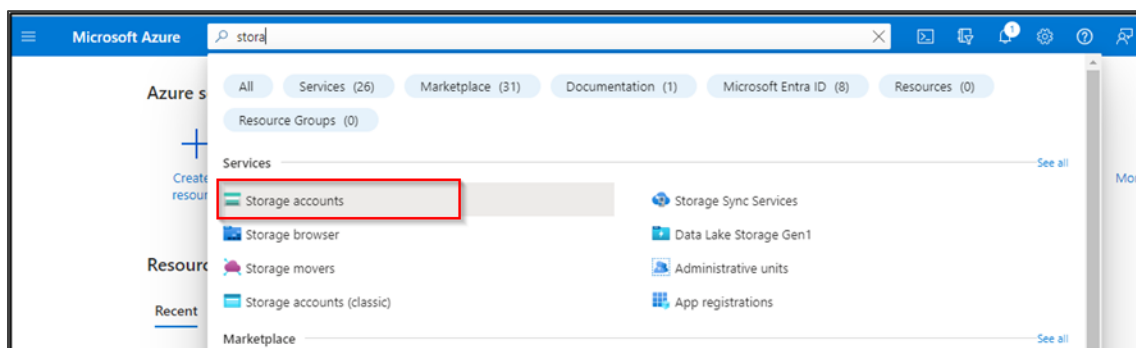

Prerequisites: A storage account

Steps to be followed:

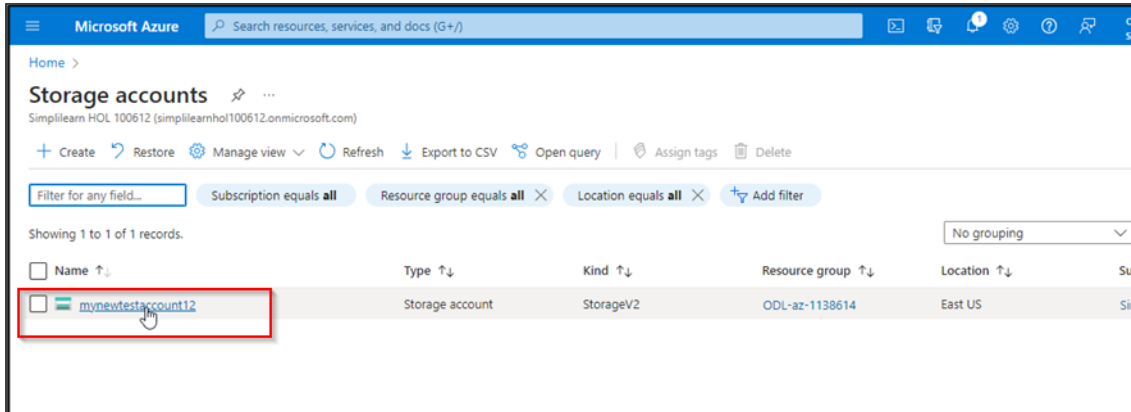

1. View and save storage account access keys
2. Install Azure Storage Explorer
3. Connect to Azure Storage

Step 1: View and save storage account access keys

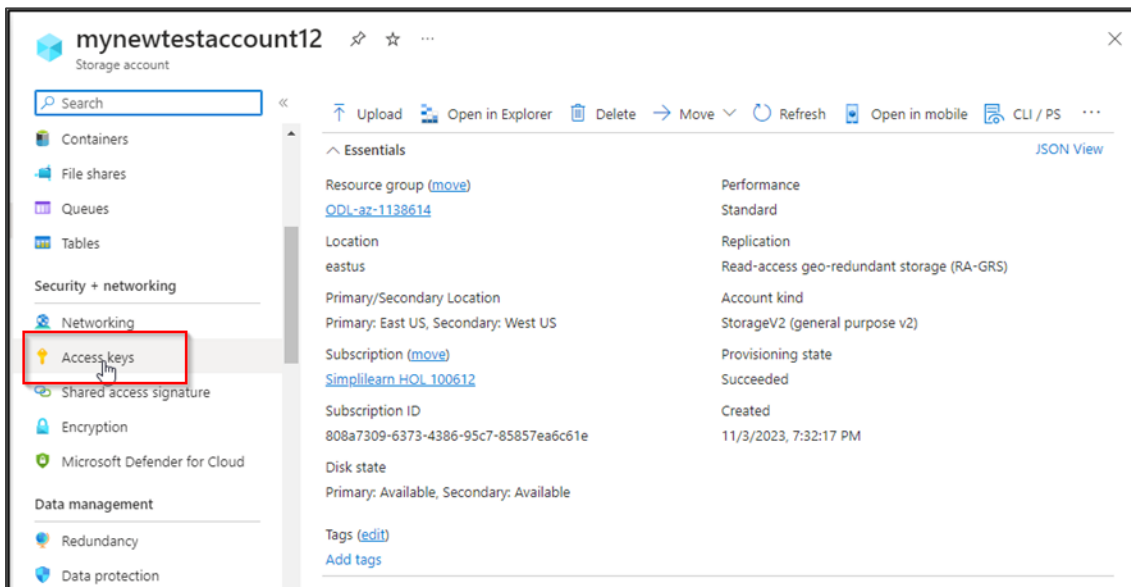

1.1 Search for and select **Storage accounts** after signing in to the Azure portal

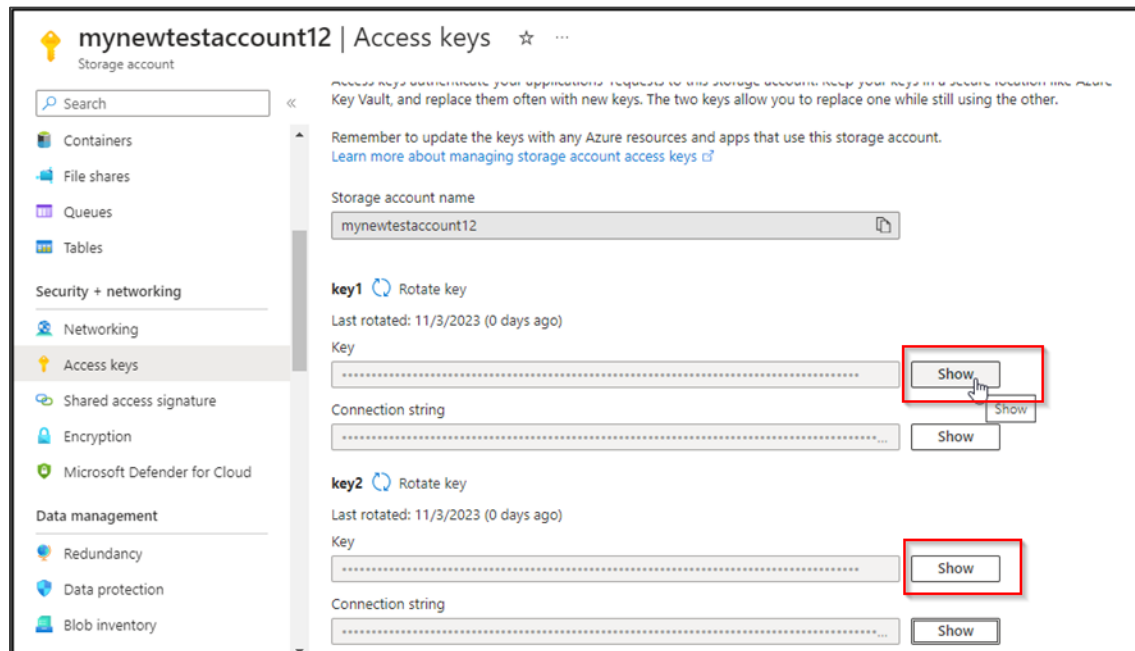

1.2 In the **Storage accounts** page, select the storage account that was already created (**mynewtestaccount12**)

1.3 In the **mynewtestaccount12** page, under **Security + networking** in the left navigation pane, select **Access keys**

1.4 In the **Access keys** page, click on **Show** to display the **key1** or **key2** as shown in the below screenshot:

1.5 Copy and save **Storage account name (mynewtestaccount12)** and **key1** or **key2** for future reference as shown below in the screenshot:

Key Vault, and replace them often with new keys. The two keys allow you to replace one while still using the other.

Remember to update the keys with any Azure resources and apps that use this storage account.

Connection string
 DefaultEndpointsProtocol=https;AccountName=mynewtestaccount12;AccountKe...  

Step 2: Install Azure Storage Explorer

2.1 In the **Azure Storage Explorer** page under **Download now**, select **Windows** to download Azure Storage Explorer application using the link below:

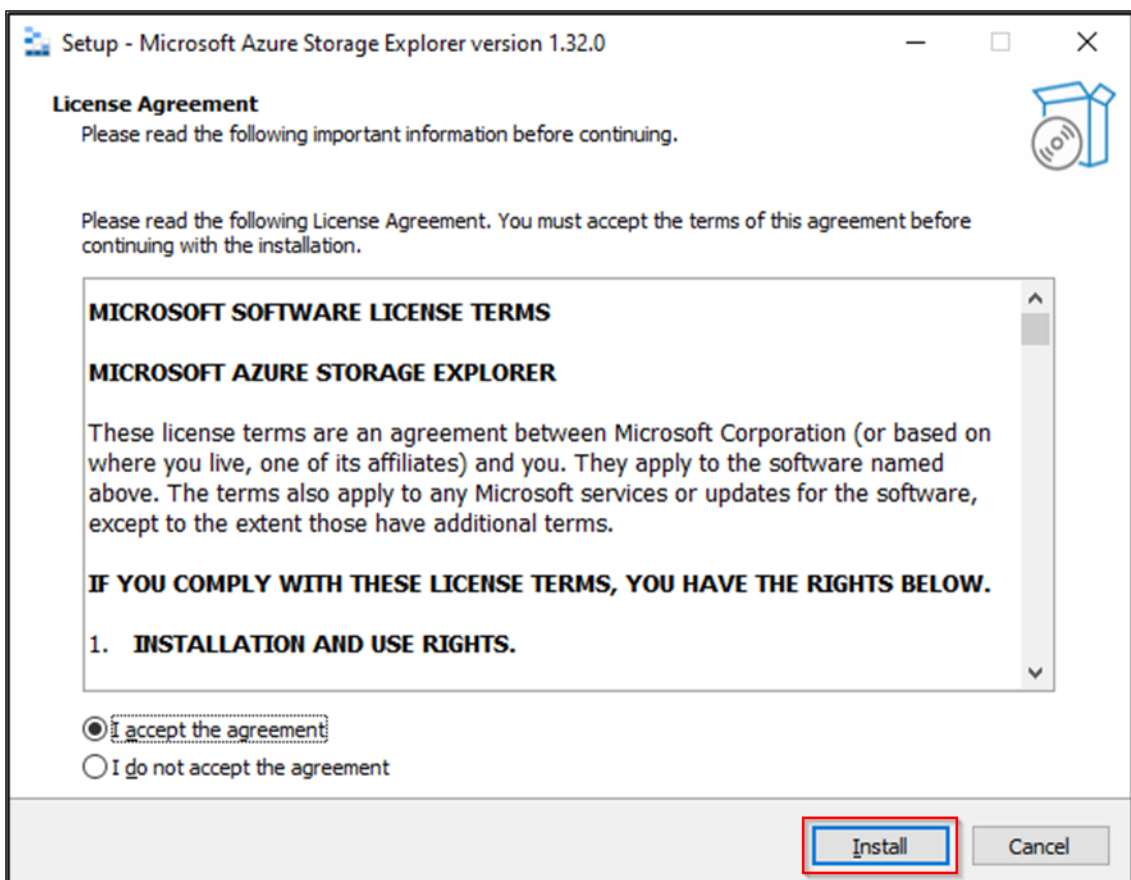

<https://azure.microsoft.com/en-in/products/storage/storage-explorer/>

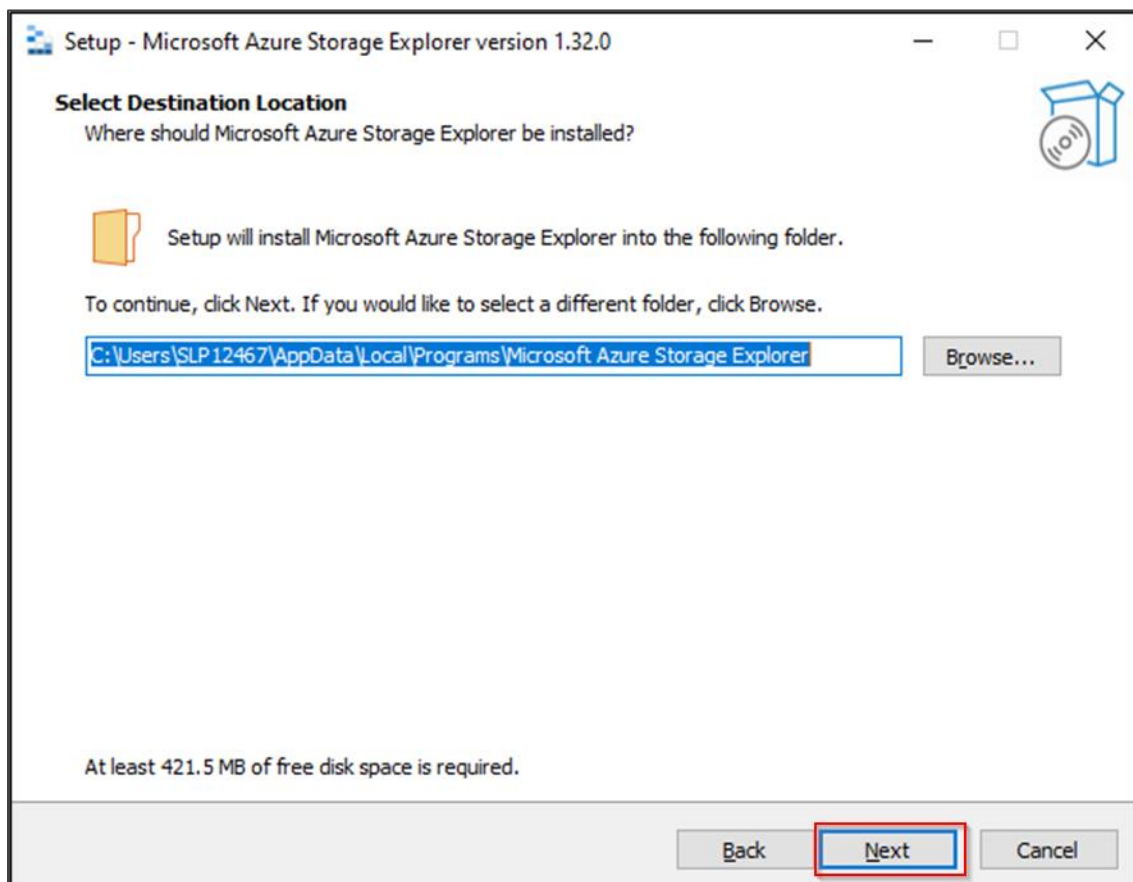

2.2 Select **Install for me only (recommended)** to select installation mode

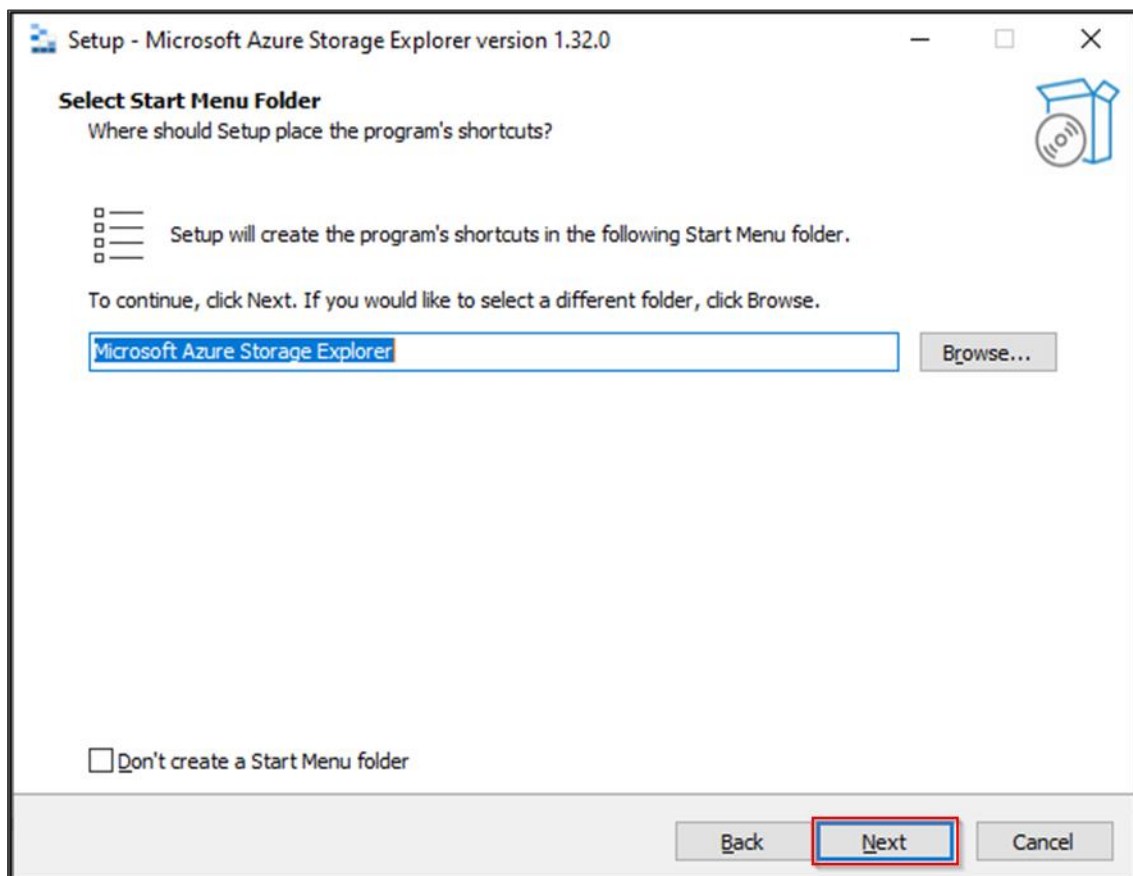

2.3 Click on **Install** to install the Microsoft Azure Storage Explorer

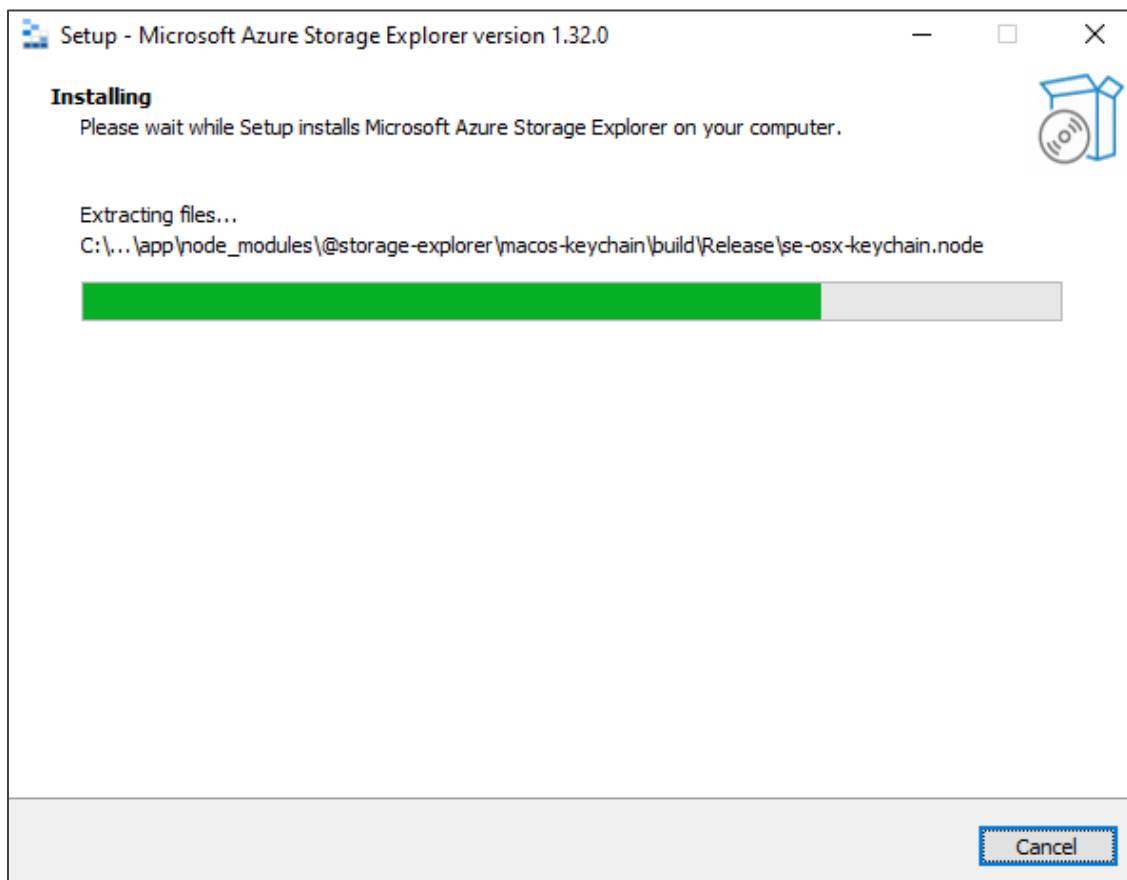

2.4 For setup, follow the onscreen instructions and click on **Next**

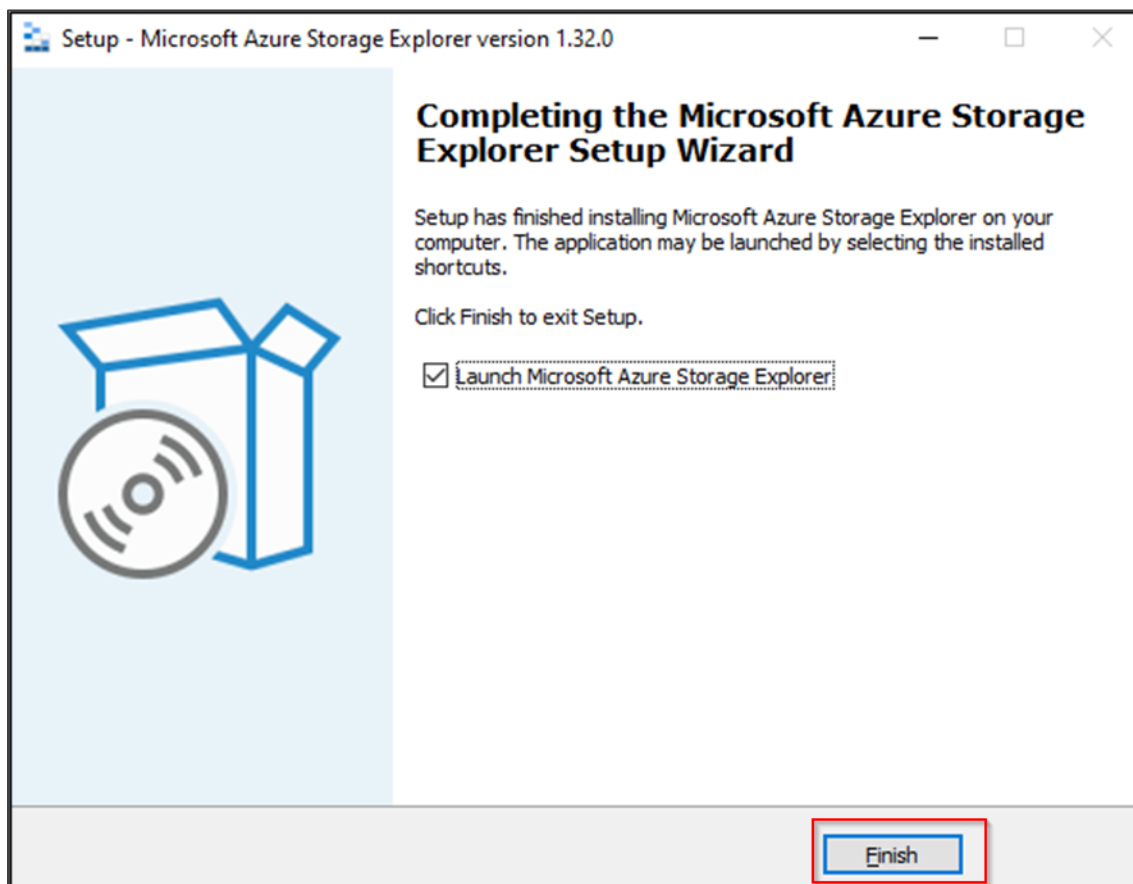

2.5 Click on **Next**

The progress of the installation is shown in the screenshot below:

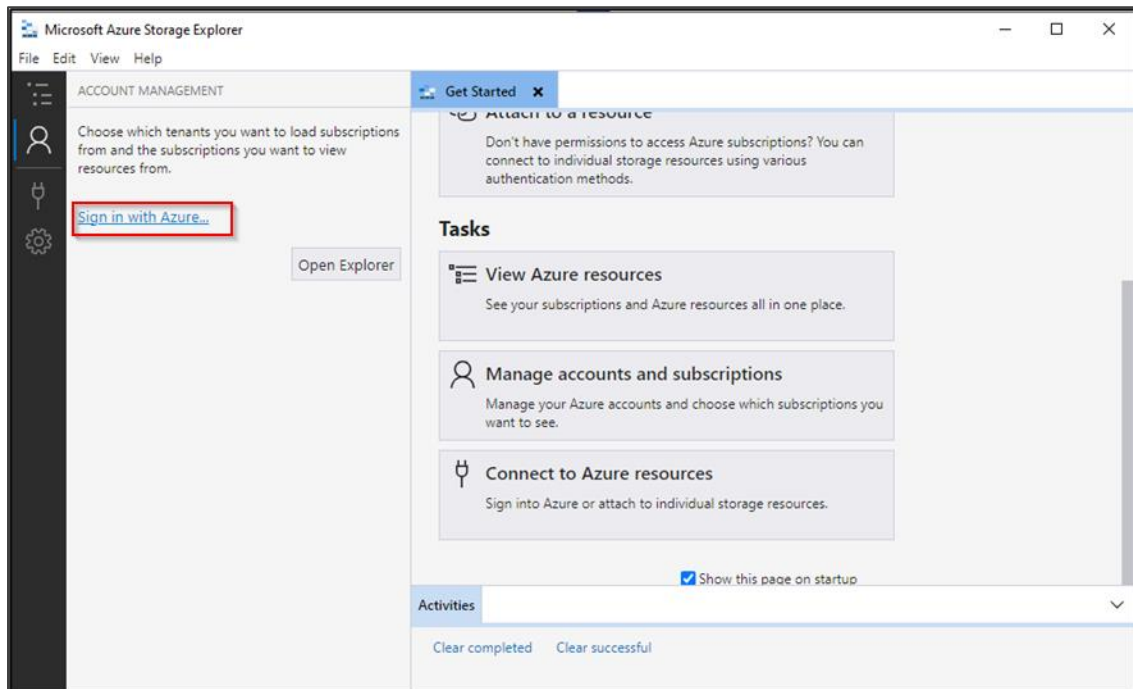

2.6 Click on **Finish** to complete the installation

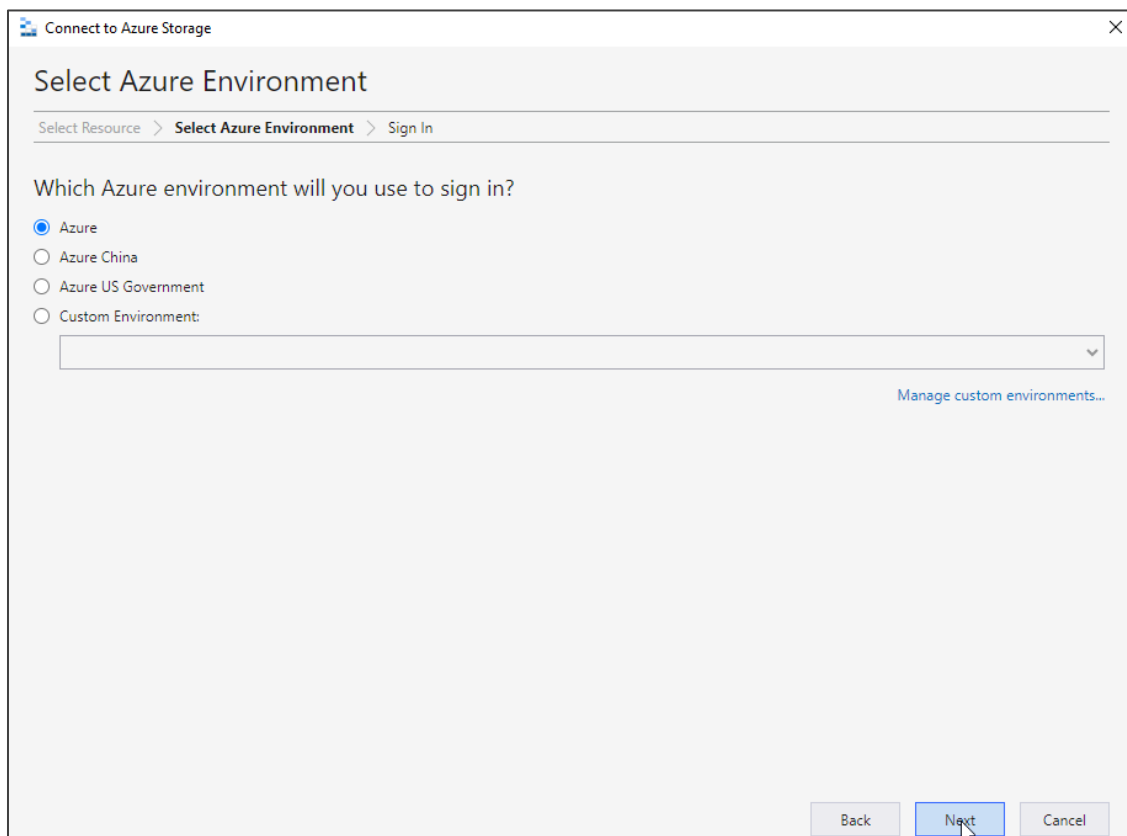

Step 3: Connect to Azure Storage

3.1 Click on **Sign in with Azure** under **ACCOUNT MANAGEMENT**

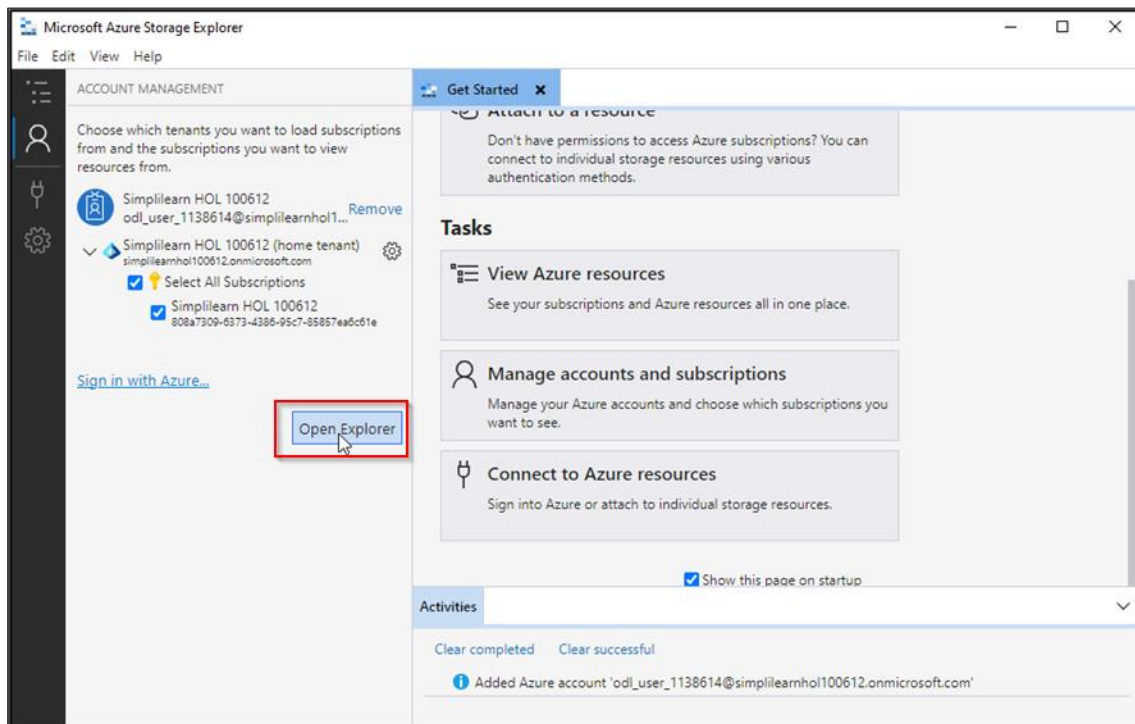

3.2 To sign in to the account, click on **Next**

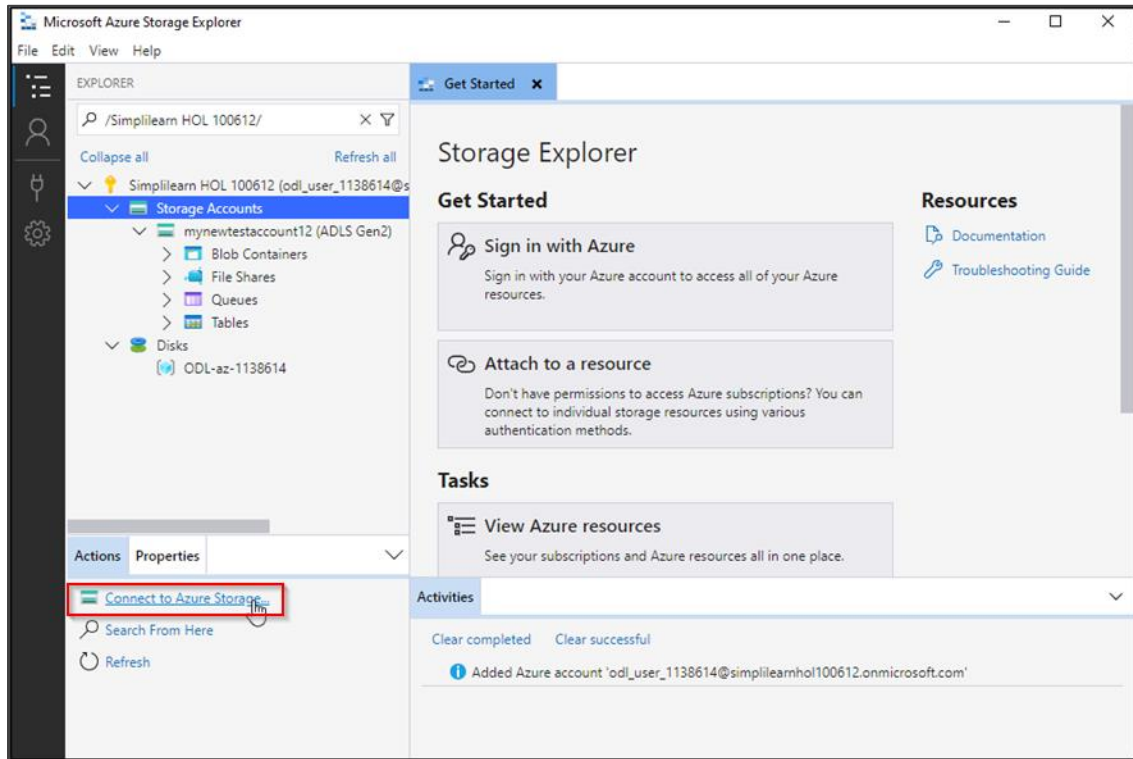

The screenshot shows a dialog box titled "Connect to Azure Storage" with a close button (X) in the top right corner. Below the title bar, the main heading is "Select Azure Environment". A breadcrumb trail reads "Select Resource > Select Azure Environment > Sign In". The question "Which Azure environment will you use to sign in?" is followed by four radio button options: "Azure" (selected), "Azure China", "Azure US Government", and "Custom Environment:". Below the "Custom Environment:" option is a text input field with a dropdown arrow. To the right of this field is a link that says "Manage custom environments...". At the bottom right, there are three buttons: "Back", "Next" (highlighted with a mouse cursor), and "Cancel".

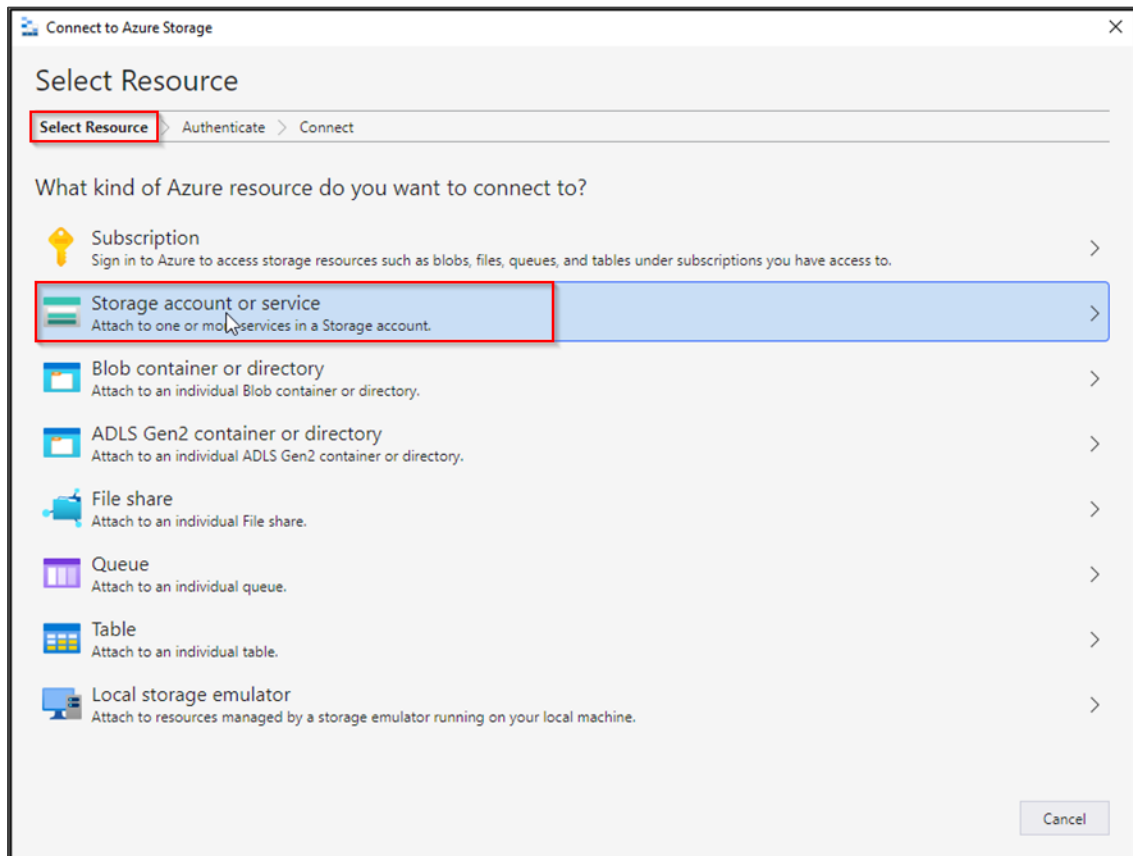

3.3 Under **ACCOUNT MANAGEMENT**, click on **Open Explorer** to connect to Azure Storage

3.4 Under **Actions**, click on **Connect to Azure Storage**

3.5 To select the kind of Azure resource, under **Select Resource** tab click on **Storage account or service**

3.6 Under **Select Connection Method**, select **Account name and key** and click on **Next**

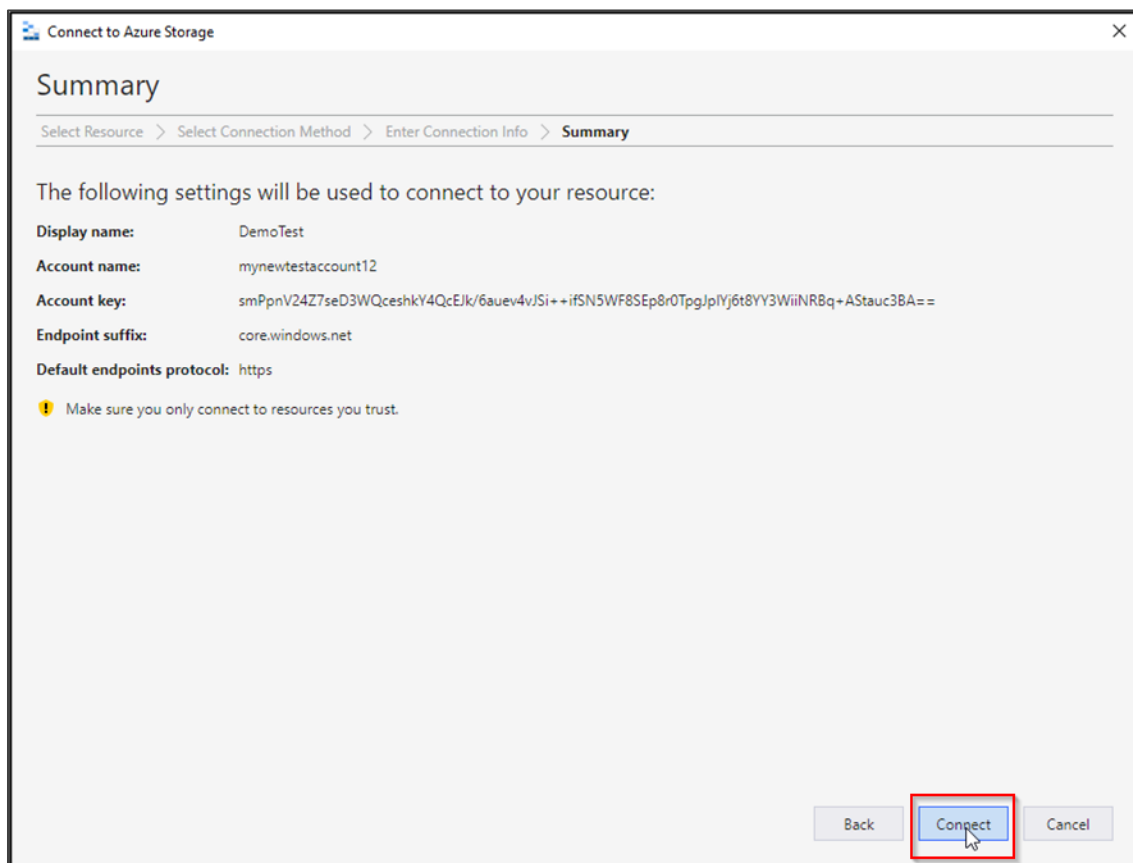

The screenshot shows a window titled "Connect to Azure Storage" with a close button (X) in the top right corner. The main heading is "Select Connection Method". Below the heading is a breadcrumb navigation bar with four steps: "Select Resource", "Select Connection Method" (highlighted with a red box), "Enter Connection Info", and "Summary". The question "How will you connect to the storage account?" is followed by three radio button options: "Connection string (Key or SAS)", "Shared access signature URL (SAS)", and "Account name and key" (selected and highlighted with a red box). At the bottom right, there are three buttons: "Back", "Next" (highlighted with a red box and a mouse cursor), and "Cancel".

- 3.7 Enter **Display name** (**DemoTest**), storage account name (**mynewtestaccount12**) under **Account name**, and any one of the keys under **Account key** that was copied in step 1.5. Then, click on **Next** as shown below in the screenshot:

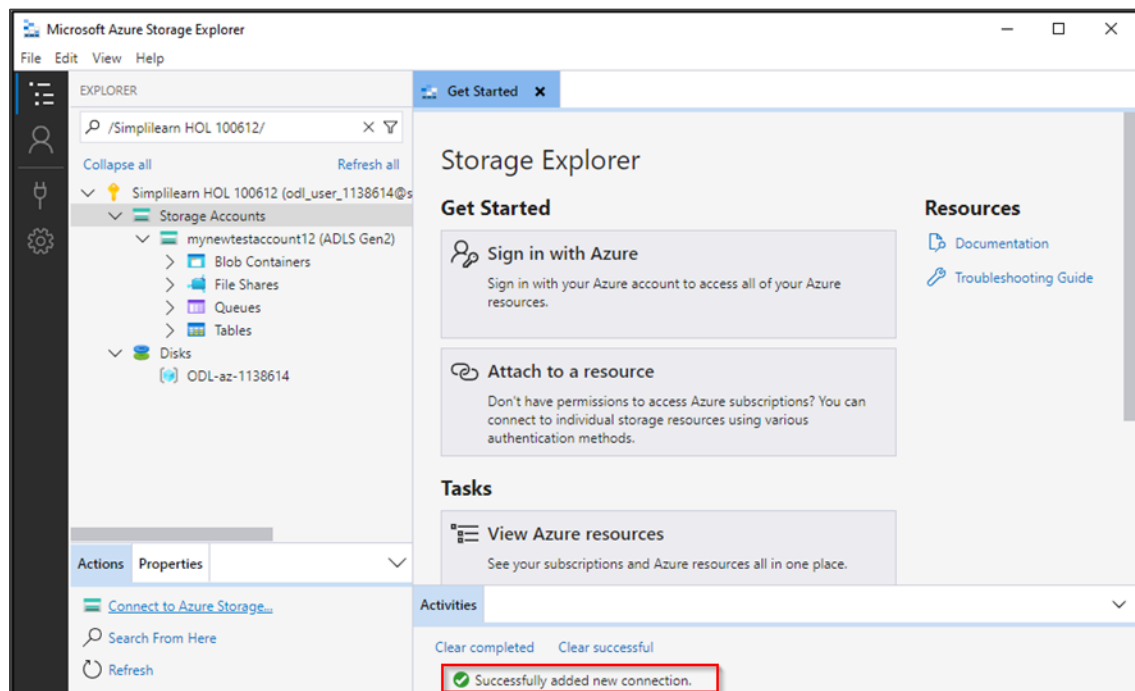

The screenshot shows the 'Connect to Azure Storage' dialog box with the following fields and options:

- Display name:** DemoTest
- Account name:** mynewtestaccount12
- Account key:** smPpnV24Z7seD3WQceshkY4QcEJk/6auev4vJSi++ifSN5WF8SEp8r0TpgJplYj6t8YY3WiiNRBq+ASTauc3BA=
- Storage domain:**
 - ☒ Azure (core.windows.net)
 - ☐ Azure China (core.chinacloudapi.cn)
 - ☐ US Government (core.usgovcloudapi.net)
 - ☐ Other: core.windows.net
- ☐ Use HTTP (not recommended)
- Buttons:** Back, Next (highlighted), Cancel

3.8 Click on **Connect**

The connection is successfully added using access keys as shown in the screenshot below:

By following the above steps, you have successfully managed the storage access keys and authorized access to the data in the storage account.
