

## Lesson 14 Demo 01

# Migrating Azure App Service Using Azure Migration Assistant

**Objective:** To migrate an Azure App Service using the Azure Migration Assistant to facilitate the seamless migration of an existing Azure App Service to a new environment or configuration

**Tools required:** Azure account with administrator access

**Prerequisites:** None

Steps to be followed:

1. Create a web app
2. Get a report for the external web app

## Step 1: Create a web app

### 1.1 Log in to the Azure portal, search for and select **App Services**

## 1.2 On the **App Services** page, click **+ Create** and select **+ Web App**

## 1.3 On the **Create Web App** page, navigate to the **Basics** tab. Now, under **Project Details**, click on **Create new** to create a new **Resource Group**.

1.4 Under **Instance Details**, provide the information as shown in the screenshot below:

Instance Details

Name \*

mywebapp0012

.azurewebsites.net

Publish \*

☒ Code
 ☐ Docker Container
 ☐ Static Web App

Runtime stack \*

PHP 8.2

Operating System \*

☒ Linux
 ☐ Windows

Region \*

East US

Not finding your App Service Plan? Try a different region or select your App Service Environment.

1.5 Under **Pricing plans**, select **Free F1 Shared infrastructure**

Pricing plans

App Service plan pricing tier determines the location, features, cost and compute resources associated with your app.

Zone redundancy

An App Service plan can be deployed as a zone-redundant or single-availability-zone only decision. You can't make an App Service plan zone-redundant if it's already zone-redundant.

Review + create

< Previous

Next : Database >

## 1.6 Click Review + create

The screenshot shows the 'Create Web App' wizard in the Microsoft Azure portal. The 'Review + create' tab is selected. The form contains the following fields:

- Subscription:** Simplilearn HOL 100817
- Resource Group:** (New) RG01
- Instance Details:**
  - Name:** mywebapp0012
  - Publish:** Code (selected), Docker Container, Static Web App

At the bottom, the 'Review + create' button is highlighted with a red box. Other buttons include '< Previous' and 'Next : Database >'.

## 1.7 Click Create

The screenshot shows the 'Create Web App' wizard in the Microsoft Azure portal, specifically the 'Review + create' tab. The 'Summary' section displays the following information:

- Web App by Microsoft**
- Free sku** (Estimated price - Free)
- Details:**
  - Subscription: 63fccccb-3215-40a5-8642-59404f9c07e9
  - Resource Group: RG01
  - Name: mywebapp0012
  - Publish: Code
  - Runtime stack: PHP 8.2
- App Service Plan (New):**
  - Name: ASP-RG01-99ae
  - Operating System: Linux
  - Region: East US

At the bottom, the 'Create' button is highlighted with a red box. Other buttons include '< Previous', 'Next >', and 'Download a template for automation'.

The web app has been created successfully as shown below:

## 1.8 Click on Go to resource

1.9 In the **mywebapp0012** page, copy the URL (**mywebapp0012.azurewebsites.net**) for the web app created under the **Default** domain

## Step 2: Get a report for the external web app

2.1 Navigate to this link: <https://azure.microsoft.com/en-in/services/app-service/migration-assistant/>

2.2 Enter the web app URL (**mywebapp0012.azurewebsites.net**) that was copied in step 1.9 and click on **Assess**

Home / Products / App Service / Azure App Service migration tools

## Azure App Service migration tools

Quickly assess your web apps and migrate them to Azure with free, easy-to-use tools

Get a free compatibility report for your external app

Run a scan on your web app's public URL for a report of the technologies it uses and whether App Service fully supports them. If compatible, you will be guided to download the migration assistant to simplify your migration.

Assess your web app for migration now.

**LIMITATION DES DOMMAGES-INTÉRÊTS ET EXCLUSION DE RESPONSABILITÉ POUR LES DOMMAGES.** Vous pouvez obtenir de Microsoft et de ses fournisseurs une indemnisation en cas de dommages directs uniquement à hauteur de 5,00 \$ US. Vous ne pouvez prétendre à aucune indemnisation pour les autres dommages, y compris les dommages spéciaux, indirects ou accessoires et pertes de bénéfices.

Cette limitation concerne:

- tout ce qui est relié au logiciel, aux services ou au contenu (y compris le code) figurant sur des sites Internet tiers ou dans des programmes tiers; et
- les réclamations au titre de violation de contrat ou de garantie, ou au titre de responsabilité stricte, de négligence ou d'une autre faute dans la limite autorisée par la loi en vigueur.

Elle s'applique également, même si Microsoft connaissait ou devrait connaître l'éventualité d'un tel dommage. Si votre pays n'autorise pas l'exclusion ou la limitation de responsabilité pour les dommages indirects, accessoires ou de quelque nature que ce soit, il se peut que la limitation ou l'exclusion ci-dessus ne s'appliquera pas à votre égard.

**EFFET JURIDIQUE.** Le présent contrat décrit certains droits juridiques. Vous pourriez avoir d'autres droits prévus par les lois de votre pays. Le présent contrat ne modifie pas les droits que vous confèrent les lois de votre pays si celles-ci ne le permettent pas.

[Accept and download](#)
[Cancel](#)

The download is successful as shown below:

**Note:** You can do a fresh greenfield deployment of your application to App Services using the steps provided in the App Service migration assistant.

By following the above steps, you have successfully configured the App Service Migration Assistant to facilitate the seamless migration of an existing Azure App Service to a new environment or configuration.
